

BIO-RESONANCE QUANTUM SCAN

Please contact info@natuvera.co.za for bookings.

*We have a practice in Port Elizabeth, as well as agents set up
in Johannesburg, Cape Town, Durban, Namibia and Scotland.*

01 Introduction

The Quantum Body Scan is a non-invasive, bio-resonance-based assessment tool that provides insight into the energetic state of the body's major systems.

By analysing the electromagnetic frequency of cells and tissues, the scanner identifies patterns that may reflect functional imbalances, nutritional deficiencies, or stress responses within the body. It is not a medical diagnostic device. Rather, it is a wellness tool designed to support holistic practitioners in identifying areas that may need attention, lifestyle changes, or further professional evaluation.

Understanding Bio-Resonance Technology:

Every cell in the human body emits a measurable electromagnetic frequency.

When these frequencies are analysed, they reveal the vibrational health of organs and systems.

The Quantum Body Scanner compares the client's frequency readings to a database of "normal" frequency patterns.

- Matching frequencies indicate normal, balanced function.
- Deviations (higher or lower than expected) may indicate stress, deficiency, or imbalance.

This allows us to see the functional tendencies of each system – long before physical symptoms appear and to support balance through natural, non-invasive interventions.

What does it scan for:

1. Cardiovascular and Cerebrovascular health
2. Gastrointestinal Function or gut health
3. Liver Function
4. Large Intestine Function
5. Gallbladder Function
6. Pancreatic Function
7. Kidney Function
8. Lung Function
9. Brain function
10. Bone Disease
11. Bone Mineral Density
12. Rheumatoid Bone Disease
13. Bone Growth Index
14. Blood Sugar
15. Trace Elements
16. Vitamins
17. Amino Acids
18. Coenzymes
19. Endocrine System
20. Immune System
21. Human Toxin levels
22. Heavy Metals
23. Basic Physical Quality
24. Allergies
25. Obesity- brown vs white fat
26. Skin health
27. Eye health
28. Collagen levels
29. Pathogens and viruses
30. Pulse of heart and brain
31. Blood lipids and PH levels
32. Gynecology and hormones (female)
33. Breast screening (female)
34. Menstrual cycle (female)
35. Prostate and hormones (male)
36. Male Sexual Function (male)
37. Sperm and semen (male)
38. Fertility
39. Parasites, toxins, chemicals
40. Thyroid
41. Spleen health
42. Emotional matrix
43. BMI and body fat percentage
44. Ideal Goal weight
